Fifteen Veteran Employees Listed on Retirement Rolls

Fifteen Lago employees retired in July. They are Rene De Vries, Plinio Kock, Maximo Arends, Juan B. Winterdal, Daniel Ras, Kenny R. Williams, Bernardino Dirksz, Egbert E. Tjin-Kam-Jet, Magnus M. I. Malmberg, Andres A. Tromp, Juan de Dios Tromp, Johan L. Van Charante, Alpheus M. E. Chase, Carlo H. Gomez and Johannes H. Flanegin.

Twenty-six years ago Mr. De Vries started working with Lago as an apprentice clerk in the Storehouse Department. His title was changed to accounting clerk II which was his last job in the Payments and Receivables Section of the Comptroller's Department.

Mr. Kock started working for Lago in November, 1931 in the Stevedores Department. Since 1962 he has been working with the Process Department as a dock attendant in the Oil Movements Division. He has almost thirty-one years of service with Lago.

Mr. Arends has twenty-seven years of service with Lago. Dec. 13, 1933, was his first day of work in the Commissary. He has been promoted to driver in the Transportation Section of the Mechanical Department.

With thirty-four years of service, Mr. Winterdal has worked longer than any of the retiring men. He started working in the Laboratory Department on March 20, 1931. Promotions have placed him in his present position as a levelman in the Refining Division of the Process Department.

"Messenger boy" was Mr. Ras' title when he started working with Lago on July 9, 1932. He has been transferred and has progressed to welder B

in the Metals Section of the Mechanical Department. His service with Lago totals over thirty-two years.

Mr. Williams started work twenty-seven years ago in the Steward's Department. After transferring and being promoted, he is presently a Supervisor in the Medical Department.

Mr. Dirksz started working for the Esso Transportation Company in May, 1935. After transferring to the Mechanical Department, he worked as a Laborer D in the Pipe Section. He has been promoted and will

George Larmonie Earns Fls. 620 For an Idea To Maintain Loading Rate

Assistant Operator, George A. Larmonie, of Process-Oil Movements is the Suggester-of-the-month for July. He was awarded Fls. 620 for his idea. He proposed that a tie-in be installed from the discharge line of pump No. 405 to a ten-inch blending line at the Loading Pumphouse. Since No. 727 blending pump was out of service, Mr. Larmonie reasoned that a tie-in would help maintain ship fuel loading rates. On Tuesday, July 27, J. F. Flaherty of Oil Movements presented Mr. Larmonie his CYI award.

Diezcinco Empleado Veterano di Lago Ta Ariba Lista pa Retiro cu Pension

Diezcinco empleado di Lago a retira cu pension na Juli. Nanata: Rene De Vries, Plinio Kock, Maximo R. Arends, Juan B. Winterdal, Daniel Ras, Kenny R. Williams, Bernardino Dirksz, Egbert E. Tjin-Kam-Jet, Magnus M. I. Malmberg, Andres A. Tromp, Juan de Dios Tromp, Johan L. Van Charante, Alpheus M. E. Chase, Carlo H. Gomez, y Johannes H. Flanegin.

Binti-seis anja pasá, Sr. De Vries a cuminza traha cu Lago como un Aprendiz Clerk na Storehouse Department. Su título a ser cambiá pa Accounting Clerk II, cual ta su actual posición den Sección di Payments & Receivables di Depto. di Comptroller.

Sr. Kock a cuminza traha na Lago na November 1931, den Departamento Stevedores. Desde 1962 el a traha cu Depto. di Process como un dock attendant den Division di Oil Movements. El tin casi treinta y un anja di servicio cu Lago.

Sr. Arends tin binti-siete anja di servicio cu Lago. December 13, 1933, tabata su promer dia di trabao den Comisario di Lago. El tabata un chauffeur den Sección di Transportacion di Depto. Mechanical.

Mayor den Servicio

Cu su treinta y cuater anja di servicio, Sr. Winterdal tin mas servicio cu cualquier di e otro hombernan cu ta bai cu pension. El a cuminza traha den Depto. di Laboratorio na Maart 20, 1931. Varios promocionnan a pone den su actual posicion di levelman den Division di Refinacion di Depto. di Process.

Binti-seis anja pasá, Sr. A. Tromp a cuminza traha na Dining Hall. Despues di transfer, el a prograsa pa operator den Depto. di Process. Su empleo na Lago a cuminza Augustus 28, 1934.

Peon D tabata e promer posición di Sr. J. Tromp na Lago. El a avanza pa su actual puesto

(Continua na pagina 6)

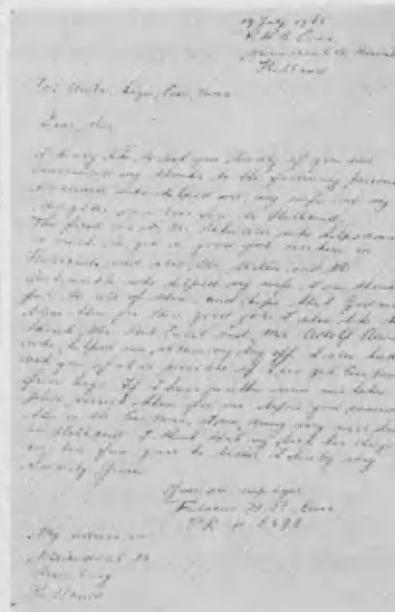

GEORGE A. Larmonie is standing by the tie-in which he suggested be installed to maintain ship fuel loading rates.

GEORGE A. Larmonie ta no conexión cu el a sugerir pa ser instalado pa mantene cifra di cargamento di vapor cu azeta.

Human Side of Statistics

The person considering the various opportunities provided through resettlement examines a series of facts. He looks at job opportunities, cost of living, educational opportunities and other statistics of this type. But this is only half of it. His concern, however, naturally goes a little beyond this type of information.

In a very real sense, he asks himself what effect the combination of all the above mentioned facts will have on him. In a word, will he and his family be "happy?"

Happiness, of course, is a personal thing. Among other things, it has to do with job satisfaction, security, comfort, educational opportunities for the children and anything else which might be of importance to a given individual. Therefore, it is not something which can be summed up in a statistic.

Still, there is another way by which we can draw some general conclusions about the possibilities of personal happiness through resettlement.

Many of us with a common background generally tend to react similarly to a given situation. As regards resettlement, we can draw upon the experiences of those already resettled. We can judge by the degrees of their reaction, especially if we know the people personally, how common might their interests and aspirations be with our own.

With this in mind, the Aruba Esso News takes pleasure in reprinting the letter received recently from Fabiano Croes, former Lago electrician now resettled in Holland.

To: Aruba, Lago Esso News

Dear Sir:

I hereby ask you kindly if you can announce my thanks to the following persons concerned, who helped me, my wife and my daughter come over here to Holland.

The first one is Mr. Schindeler, who helped me so much to get a good job over here in Holland, and also Mr. Willis and Mr. Antonette who helped my wife. I am thankful to all of them and hope that God may bless them for their good job. I also like to thank Mr. Bob Ewart and Mr. Adolf Arends who helped me obtain my layoff. I also kindly ask you if it is possible that I can get the Esso News from Lago. If I have written some mistakes, please correct them for me before you publish this in the Esso News.

I am doing very well here in Holland. I think that my luck has changed over here from good to better. I remain,

Sincerely yours,
Your Ex-employee,
Fabiano H. B. Croes

Banda Humano di Statistiek

Un persona cu ta considera e varios oportunidadnan cu e programa di re establecimiento ta duna ta examina un serie di hechonan. El ta tira un bista ariba e oportunidadnan di trabao, costo di bida, oportunidadnan di educacion y otro informacionnan di e claseaki. Pero esaki ta solamente mitar tocante e asunto aki. Su preocupacion, sinembargo, naturalmente ta bai un poco mas leuw cu e clase di informacion aki.

Den un berdadero sentido, el ta puntra su mes ki efecto e combinacion di tur e hechonan mencioná aki riba lo tin ariba dje. Den un palabra, esaki tin di haber cu satisfaccion di trabao, seguridad, confortabilidad, oportunidadnan di educacion pa e muchanan y cualquier otro cos cual por ta di importancia pa un cierto persona. Pesey, esaki no ta algo tocante cual por duna un resumen den un statistiek.

Pero asina mes, tin un otro manera den cual nos por saka algun conclusion general tocante e posibilidadnan di felicidad personal door di re establecimiento.

Hopi di nos cu tin un experiencia generalmente comun tin e tendencia di relacioná den un mes manera den un cierto situacion. En cuanto ta toca re establecimiento, nos por sinja for di ex-

Esso Nederland Lo Traha Planta di Amonia-Fertilizante na Rotterdam

Esso Nederland recientemente anuncia planan pa construi un planta grandi pa produci amonia y otro fertilizantes na Rotterdam, na unda e refineria principal di e compania ta situá na Hulanda.

Den e pasado cinco anja, Jersey Standard su afiliadonan a construi plantanan di amonia na Antillas Hulandes (Aruba), Colombia y Spanja, mientras otronan ta bao construccion na Filipinas, Malasia, Pakistan y Grecia.

RETIREMENT

(Continued from page 1)

retire as a Pipefitter Helper A with twenty-seven years of service behind him.

July 26, 1939, was Mr. Tjin-Kam-Jet's first working day in the Stewards Department. He has been transferred and promoted to operator in the Refining Division of the Process Department. He has worked with Lago for over twenty-six years.

Since November, 1938, Mr. Malmberg has been working in the Process Department. Process helper D was his first job title. Having been promoted, he retired as an assistant operator. He has almost twenty-seven years of service behind him.

Twenty-six years ago Mr. A. Tromp started working in the Dining Hall. After transferring he progressed to operator in the Process Department. His work with Lago in 1934.

Laborer D was Mr. J. Tromp's first position with Lago. He has advanced to his present job, boilermaker helper A, in the Mechanical Department. His work with Lago commenced more than twenty-three years ago on Aug. 13, 1941.

Mr. Van Charante started working for Lago in December, 1945, as a process helper D in the Utilities Department. He has progressed to his present position, assistant operator, in the Process Department.

Mr. Chase will retire as staff Nurse in the Medical Department. He started out his career with Lago eighteen years ago as a junior nurse.

Mr. Gomez will retire with over twenty-two years of service behind him. He was originally employed as a laborer D, but has been promoted to sandblaster in the Mechanical Department. April 2, 1937, was his first day of work.

September 15, 1934, was Mr. Flanegin's opening of work as laborer second class in Pipe. Since his advancement to pipefitter A, he has been working for the Metals Section of the Mechanical Department.

Standard Oil (New Jersey) Earnings Off Six Per Cent in First Half of 1965

Earnings of the Standard Oil Company (New Jersey) and its affiliates worldwide for the six months ending June 30 were today estimated at \$505,000,000, equal to \$2.34 per share based on the average of 215,617,000 shares outstanding. M. L. Haider, chairman of the board, said that this was a decrease of \$32,000,000, or 6.0 per cent, from the \$537,000,000 or \$2.49 per share reported for the first half of 1964.

In commenting on the earnings results, Hr. Haider noted that there was an improvement in second quarter realizations for motor gasoline and other petroleum products in the United States, but this was more than offset by the impact of depressed prices in Europe that developed in the second half of last year.

Also cited by Mr. Haider was an increase in costs both in the United States and abroad, associated with expanded efforts for diversification of Jersey Standard's worldwide crude oil and natural gas reserves, and for the development of additional and growing petroleum and chemical markets.

Significant volume increases during the first half year included a 7.3 per cent rise in product sales worldwide, with production of crude oil and gas liquids up by 6.5 per cent. Further substantial gains were achieved in natural gas sales, particularly in the United States period last year.

States where deliveries under new long-term contracts contributed to a 23 per cent rise over the first half 1964.

Income and operating taxes, together with import duties, consumer taxes and other payments to the U.S. and foreign governments totaled \$2,019,000,000 for the first six months of 1965. For the same period in 1964, such payments totaled \$1,847,000,000.

Expenditures for property, plant and equipment by the consolidated companies, expected to exceed one billion dollars again this year, totaled \$420,000,000 for the first six months as compared with \$500,000,000 spent in the same period last year. It was also noted that in the worldwide search for oil and gas reserves, a further \$119,000,000 was spent and charged to income in the first half this year.

Refinery runs by Jersey affiliates worldwide averaged 3,857,000 barrels a day in the first half compared with 3,557,000 barrels daily for the same period last year.

YOUTH LEADERS, teachers learn theory and practice of main recreational activities. Key to 10-week course was "learning by doing."

LIDERNAN DI Juventud, maestro y maestra ta sinja teoria y practico pa dirigi recreacion. Punto principal tabata: "sinja door di haci".

Island's Teachers, Recreation Leaders Finding Out: 'It's All in the Game'

Thirty-five school teachers and youth leaders are currently taking part in a Recreation Workshop. The ten-week course began June 29. Classes are held in Lago's Youth Activities Building west of Lago Sport Park.

Classes are under the guidance of YMCA Director Julio Sanjurjo and his staff. Both men and women are participating in the once-a-week activities.

The workshop covers both theory and practice in operating different kinds of recreation

programs. Some of the organizations represented include Spes Patriae, Methodist Church, Young People's Harmony Club, Christian Women's Welfare Association, Connie Francis Teenagers and the Young Men's Christian Association.

Completed in July, 1962, the Lago Youth Activities Building serves as a meeting place for various island youth groups.

The building contains meeting rooms, activity rooms, handicraft rooms, an auditorium, lavatory facilities and office space.

Rosendo Nicolaas Awor Por Yuda Estudiantenan Mescos cu el a Ser Yuda

Rosendo A. Nicolaas, de PR/IR Training Division, recently completed a loan assignment at Aruba Chemical Industries. Originally, he planned to be at ACI one month, but stayed five months. He started work on Feb. 22, and in his time there performed many varied tasks.

Awor cu Rosendo ta back na Lago, el lo substitui Carlos de Cuba como Coordinator di Training mientras Carlos ta ocupa un otro posicion. Den su puesto nobo, Rosendo lo trata asuntonan cu ta toca Lago Scholarship Foundation y e Programa di Asistencia Educacional di Lago.

Rosendo mester ta mas cu normalmente interesá den su trabao nobo. Tabata como un ganador di un beurs di Lago Scholarship cu el a caba su educacion di colegio na Universidad di Vermont. Rosendo a gradua for di e institucion ey na 1963 cu un grado comercial.

Promer di a gradua el a traha durante dos verano como un estudiante "trainee" den Departamento Técnico y di Comptroller. El a cuminza su carrera oficial na Lago ariba Mei 2, 1963 como un Asistente di Personal den Training Division. Den tal trabao el a duna les den Ingles. Despues el a haya cambio pa Division di Personal y a keda aya te na su asignacion di prestamo na ACI.

W. Ho-Sing-Loy	Fls. 30
TECHNICAL DEPARTMENT	
I. R. Martinez	Fls. 25

Among his duties were writing industrial relations procedures, gathering data and preparing statistics and writing for the monthly "Barcadera News."

Now that Rosendo is back at Lago, he will substitute for Carlos de Cuba as training coordinator while Carlos fills another position. In his new post, Rosendo will handle matters concerning the Lago Scholarship Foundation and the Lago Educational Assistance Program.

Rosendo should be more than normally interested in his new duties. It was as a Lago Scholarship winner that he completed his college education at the University of Vermont. Rosendo was graduated from that institution in 1963 with a business degree.

Before graduation he had worked two summers as a student trainee in the Technical and Comptroller's Departments. He began his official Lago career on May 2, 1963 as a personnel assistant in the Training Division. In that job he taught English in the language laboratory.

He was then transferred to the Personnel Division and remained until his ACI loan as-signment.

Dramatic Moments Mark Eleventh ASU Olympiad

Thirty-Two Action-Packed Events Bolster Sports Extravaganza

The eleventh Aruba Sports Union Olympiad started with a rush of activities on the evening of July 8, in the Wilhelmina Stadium. The agenda included a parade by various sports delegations, speeches, presentation of 21 sports queen candidates and the naming of Sam Jacobs as Sportsman of the Year.

The Olympiad from July 8—18 included 32 island-wide events. Venezuela and Curaçao sent major delegations. Baseball, bowling, soccer, basketball, track and field, and billiards were some of the major crowd pleasing events.

Wilhelmina Stadium was the arena for five events, Lago Sport Park for six and the Aruba Caribbean Hotel for five. Various island clubs were hosts for other activities.

Closing ceremonies were held at Wilhelmina Stadium. During the closing festivities Aura Croes was elected sports queen. Miss Croes was sponsored by the Aruba Basketball Association.

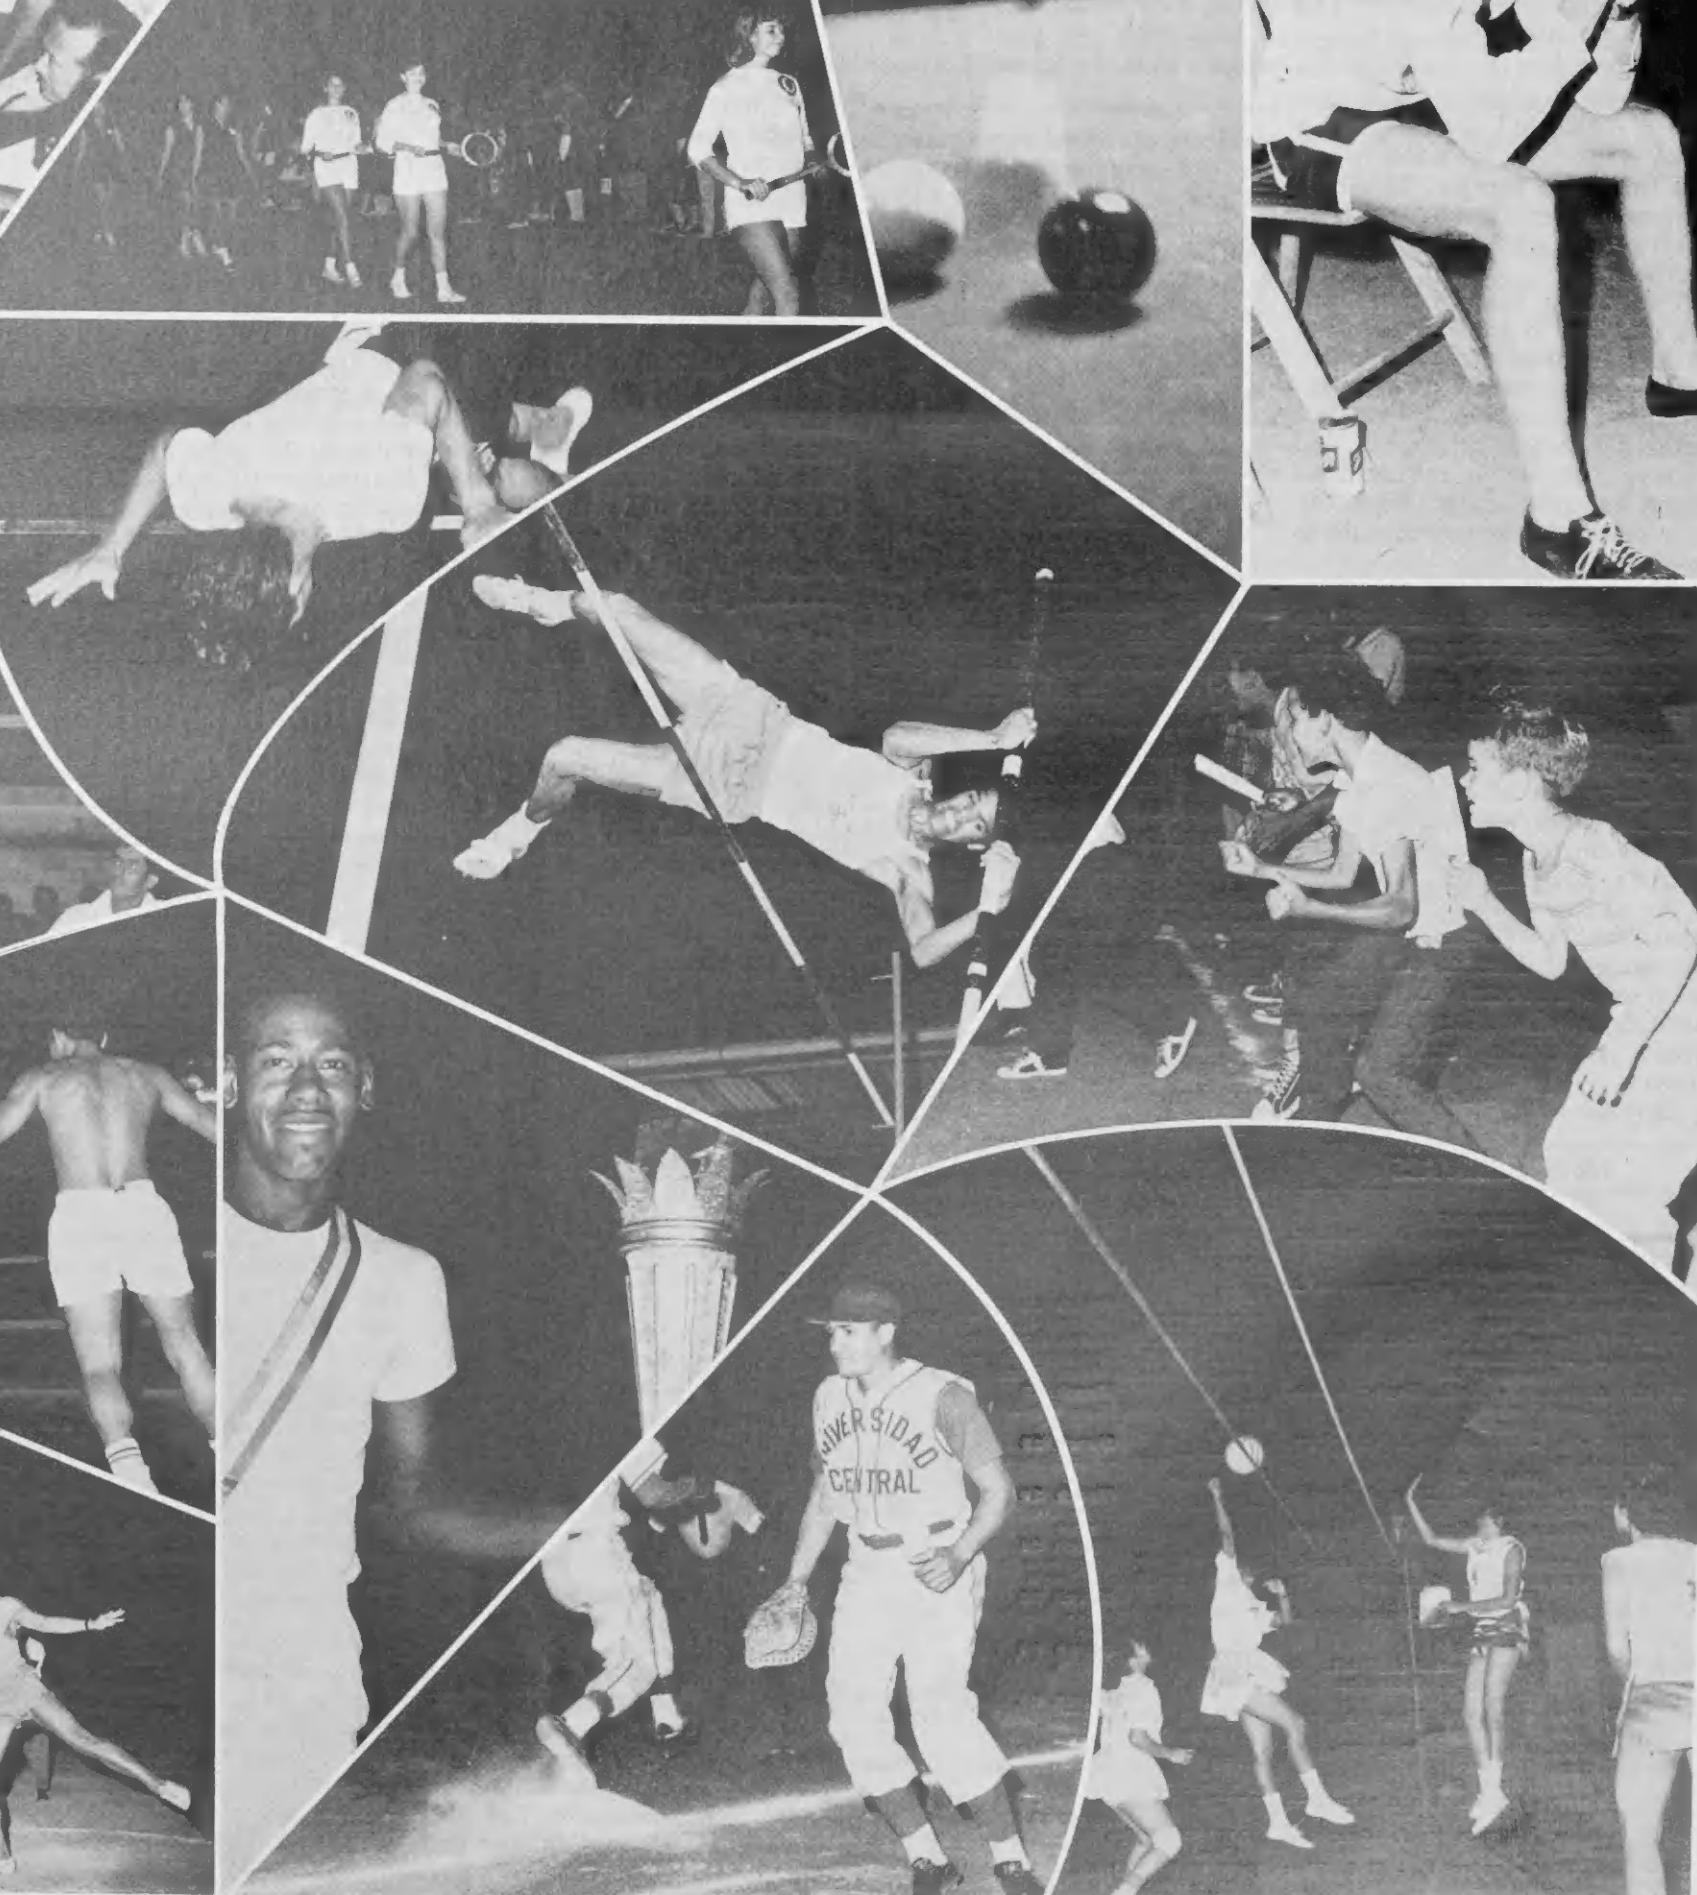

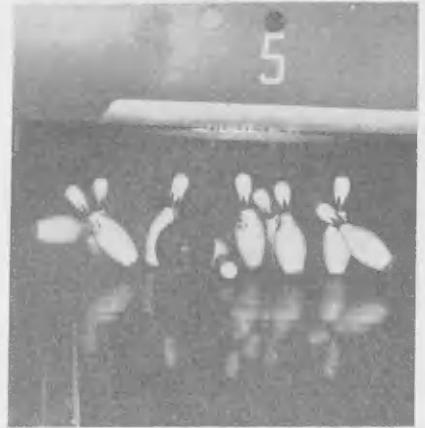

Multi Accion Presenta Den Potente Olimpiada di ASU

Di diezun Olimpiada di Aruba Sport Unie a principia cu hopi actividadnan ariba e anochi di Juli 8 den Wilhelmina Stadion. E agenda tabata inclui un parada door di varios delegacionnan di deportes, discursos, presentacion di 21 candidata pa reina di deporte y nombramento di Sam Jacobs como Deportista di Anja.

E Olimpiada for di Juli 8 te 18, a inclui 32 evento ariba henter e isla. Venezuela y Curaçao a manda delegacionnan special. Beisbol, futbol, bowling, basketball, eventonan ariba veld y pista di carreda, y biliard tabata algun di e eventonan cu a atrae mas publico.

Wilhelmina Stadion tabata e arena pa cinco evento, Lago Sport Park pa seis evento, y Aruba Caribbean Hotel pa cinco. Varios clubnan ariba e isla a ser usa pa otro actividadnan.

E ceremonianan final a ser teni na Wilhelmina Stadion. Durante e festividadan final, Aura Croes a keda elegi como Reina di Deporte.

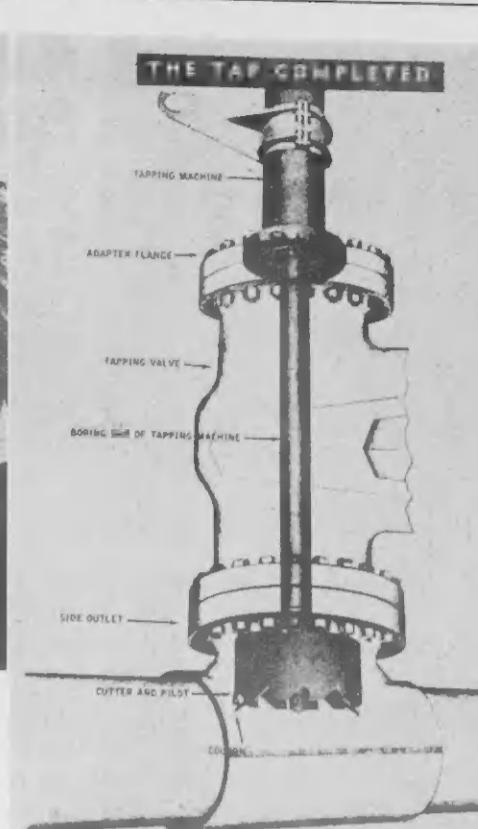

Giraffe's long neck is essential at some locations in pipe alleys. It enables the Mechanical men to make adjustments to tapping machine. Final arrangements and checks precede drilling operations. Inside view shows circular saw after cut is made.

Nek largo di Giraf ta esencial na algun lugar den linjanan di tubo. El ta permiti hombernan di Mechanical pa haci ahustamento di e aparato di bora. Arreglonan y checkmento final ta necesario. Vista paden ta munstra zaag di mashien di bora despues cu buracu a ser borá.

New Hot Tapping Machine Makes On-Stream Line Connection Possible

A new extra large hot tapping machine was placed in service recently by Mechanical's Metals Section. The new machine makes it possible to make a connection into a pipeline or vessel while it is still in operation.

The new hot tap machine will be used to make from 35-75 taps into various sizes of lines carrying different products. All these taps will be made while the line is in service. This feature results in considerable time savings, compared to previous methods.

Previously, the job of hooking one line to another required taking the line out of service, washing it free of gases, inspecting it thoroughly so that cutting torches could be used safely. This often required as much as three days. With the new machine not one minute is lost.

Although the new machine and its power unit can drill up to 36 inch taps, only one 16-inch cutter is presently in use.

First field test was made using the 16-inch circular cutter on July 21. Metals Section Job Inspector Modesto Figaroa and his crew worked on a gas oil line north of Tank 183. The entire tap required 100 minutes.

To operate the hole cutter, cooperation is necessary among personnel of Mechanical, Technical and Process. Equipment needed includes a large capacity crane, a giraffe truck and a hoist.

Several safety precautions are

carefully observed during an actual tap. One such precaution is the proper use of the air bleeding system to insure that no air is left in the equipment.

Another general precaution is the proper precision alignment of the welded nozzle onto the pipe line.

Empleadonan Ta Baha Accidentenan Pafor Di Trabao na Mitar

"Salba Bidanan den 1965" ta parce di ta e lema di seguridad pa empleadonan di Lago y nan familia e anja aki. Empleadonan di Lago a rebaha nan accidentenan pafor di trabao casi na mitar y nan familia a progesa tambe casi mes tanto.

Anja pasá e cantidad total di accidentenan pafor di trabao pa empleadonan di Lago tabata 958, locual ta como ochenta pa luna. Te Juni e anja aki, solamente 279 accidente pafor di trabao a tuma lugar, locual ta igual cu cuarenta y siete pa luna.

E miembran di familia di empleadonan di Lago ta merece mencion special. Nan tur hundo tin menos accidente cu e empleadonan di Lago sol. Nan a reduci nan cantidad di accidente pa luna for di trinta y cuatro na 1964 pa binti-cuater te Juni 1965.

Esso Netherlands Announces Plans For New Ammonia-Fertilizer Plant

Esso Netherlands recently announced plans to build a major plant for the production of ammonia and other fertilizers at Rotterdam, site of the company's principal refinery in Holland.

Esso Netherlands, an affiliate of Standard Oil Company (New Jersey), reports that the capacity of the plant will be 300,000 tons a year and will employ both refinery gas and Dutch natural gas. It is anticipated that the plant will come on stream in early 1968.

A contract has been made for the sale of ammonia from the new plant to Eurofert Netherlands, N.V. of Vlaardingen, Holland. This company was formed by E. E. Eerste Nederlandsche Cooperatieve Kunstmestfabriek Wind Mill Fertilizer Works, Vlaardingen, and Central Resource Corporation, New York.

In addition to selling ammonia, Esso Netherlands will convert a portion of it to urea as part of the same project. The urea will be sold in world export markets, and will make a major contribution to the program of the Esso organization in meeting the needs of agriculture on a worldwide basis.

In the past few years, Jersey Standard affiliates have built ammonia plants in the Netherlands Antilles (Aruba), Colombia and Spain, while others are under construction in The Philippines, Malaysia, Pakistan and Greece.

Employees Back the Attack On Off-the-Job Accidents; Injuries Slashed in Half

"Save Lives in '65" appears to be the safety motto for Lago employees and their families this year. Lago employees have cut their off-the-job accidents almost in half, and their families have progressed nearly as far.

Last year the total number of off-the-job accidents for Lago employees was 958, approximately eighty per month. Through June of this year only 279 off-the-job accidents have occurred, which is the same as forty-seven per month.

The family members of the Lago employees deserve special mention. All of them together have fewer accidents than the Lago employees alone. They have reduced their number of accidents per month from thirty-four in 1964 to twenty-four through June of 1965.

DIEZCINCO VETERANO

(Continua di pagina 1)

di Boilermaker Helper A den Depto. Mechanical. El a cuminza traha na Lago mas di binti-tres anja pasá, ariba Aug. 13, 1941.

Sr. Van Charante a cuminza su empleo na Lago na December 1945, como un Process Helper D den Utilities Department. El a progresá pa su actual posicion di Assistant Operator, den Depto. di Process.

Sr. Chase lo retira como un Staff Nurse den Depto. Medico. El a principia su carera na Lago diezochu anja pasá como un Junior Nurse.

Sr. Gomez lo retira cu pension cu mas di binti-dos anja di servicio tras di lomba. Originalmente, el a ser empleá como un Peon D, pero el a haya promocion pa Sandblaster den Departamento Mechanical. Su promer dia di trabao tabata April 2, 1937.

September 15, 1934 tabata Sr. Flanegin su dia cu el a principia trabaon na Lago como un Peon Segunda Clase den Sección di Tuberia. Desde cu el a avanza pa Pipefitter A, el ta trahando pa Sección di Metal di Depto. Mechanical. Su servicio ta yega un total di casi treinta y un anja.
